Lookout Mobile Security® Summary

Mobile Security is a service provided by Lookout. You must install and then register for Mobile Security and then you will be provided the End User Licensing Agreement from that third party, which will include your rights for the product and the product's terms of use. Mobile Security is not an insurance product or a service contract, but can be sold as part of the JUMP! program, Premium Handset Protection or on its own for \$4 a month per device. Available on select devices; technical limitations may prevent certain features (e.g., LOCK) from working on certain phones. Phone must be powered on with the SIM card installed, have text messaging capability, and be within the T-Mobile network coverage area for features to function. Enabling location history features can cause phone battery life to diminish more quickly. Once phone is WIPED, the data is not retrievable. Data usage applies for download and use of Mobile Security. As with other software, Mobile Security may be disabled or uninstalled by other applications, software, devices or hacking. In this event, the protective features of Mobile Security may not function properly. In addition, even though installed, Mobile Security may not function properly due to other prior installed software on your device.
